WILDBIRD CARE 2020

TOM CHAMBERS

Handcrafted Quality Since 1967

It is very easy to underestimate what joy gardens bring to people's lives. This has been highlighted during the uncertain times we are living through at the moment and demonstrated by the high demand for outdoor products plus the excitement we all felt when Garden Centres could finally open their doors again.

During the past few weeks we have been busy preparing the launch of this year's Bird Care range and how to build on last season's success.

The new range is once again packed with new and innovative products, stunning new designs have been added to our handcrafted bird table collection keeping this category exciting and fresh.

New additions include a wonderful smaller Dovecote perfect for any garden and the Prestige Cartmel table crafted from heritage style painted timber.

Our already comprehensive range of feeders now has the addition of 8 Pewter Flick 'n' Click feeders, a range of heavy-duty feeders offered in a stylish pewter coating which include specific feeders for sunflower hearts and mealworms.

We have also added more squirrel resistant feeders to our portfolio which include improved versions of the Squirrel Stop in both seed and peanut versions manufactured from steel.

The full range of fat ball and suet products have benefitted from a brand-new look with crisp, eye-catching bright labelling. Many of the products are now offered in a colourful counter/shelf ready display box, helping to solve merchandising solutions and make shopping easier.

In addition to all of the above we are continuing with our growth and expansion plans throughout the business.

The Tom Chambers Mission

Our commitment to reducing environmental impact

- Looking at using less packaging in all areas of our business
- Using waste packaging and waste timber in our innovative bio-mass boiler to heat our warehouse and factories
- We no longer run our fleet of wagons for deliveries. We work with our chosen couriers who run more effective delivery routes reducing emissions
- We are proud to produce quality products which will ensure cycles of re-use, meaning less products will end up in landfill
- As a British manufacturer we produce around 60% of our products on site in Yorkshire, ensuring a much smaller carbon footprint
- We are FSC certified and all the timber which arrives in our factory comes from responsibly managed forests

Our commitment to recycling

- We are a member of the OPRL, the On-Pack Recycling Label scheme who's aim is to deliver a simple, consistent and UK wide recycling message on all packaging
- Many of our labels have been updated and re-designed to now include the on pack recycling message
- All our bird food bags can be recycled and carry the 'recycle me' logo, simply recycle them either kerbside or in larger stores

Our commitment to the future

- We are striving to find more ways to lessen our impact on the environment such as new greener machinery and more sustainable packaging options
- Even little things such as using less wrap on our pallets all help to reduce waste and so conserve natural resources
