TOM CHAMBERS

Handcrafted Quality Since 1967

This year has proved to be an extremely interesting season with the nation falling in love with gardening and nature during and after lockdown.

As a company we have been busier than with ever with the entire gardening range selling phenomenally well. This growth has lifted the team's spirits and created a good feeling throughout not only Tom Chambers but the whole of the Gardening Industry.

The popularity of Grow Your Own has rocketed during the past few months so we have extended our Harvest Range with the addition of vegetable planters crafted from sustainable timber and built to specification perfect to create the home vegetable patch.

Also new to the Garden range is the unique Valentine Obelisk with its feature heart finial and the Colonus Obelisk designed to add the wow factor to a garden. Our range of plant supports has been further developed with the new Botanical collection featuring a spiral and herbaceous plant supports and a cloche, all coated in an antique, rust effect finish.

Garden Furniture is also a rapidly expanding category for the brand. We have several projects in the pipeline, look out for our brand new range of seat pads and cushions for our UK made range of furniture coming soon!

We would like to add that we hope you are all safe and well and we thank you for your continued custom and support.

The Tom Chambers Mission

Our commitment to reducing environmental impact

- Looking at using less packaging in all areas of our business
- Using waste packaging and waste timber in our innovative bio-mass boiler to heat our warehouse and factories
- We no longer run our fleet of wagons for deliveries. We work with our chosen couriers who run more effective delivery routes reducing emissions
- We are proud to produce quality products which will ensure cycles of re-use, meaning less products will end up in landfill
- As a British manufacturer we produce around 60% of our products on site in Yorkshire, ensuring a much smaller carbon footprint
- We are FSC certified and all the timber which arrives in our factory comes from responsibly managed forests

Our commitment to recycling

- We are a member of the OPRL, the On-Pack Recycling Label scheme who's aim is to deliver a simple, consistent and UK wide recycling message on all packaging
- Many of our labels have been updated and re-designed to now include the on pack recycling message
- Our union jack labels are all manufactured from polypropylene, they can be widely recycled in household recycling bins

Our commitment to the Future

- We are striving to find more ways to lessen our impact on the environment such as new greener machinery and more sustainable packaging options
- Even little things such as using less wrap on our pallets all help to reduce waste and so conserve natural resources
